# What we do

We make our customers **#energyconfident** by addressing the four **major risks** associated with business energy spend.

**Price Risk**

**Billing Risk**

**Consumption Risk**

**Delivery Risk**

We work with you to **reduce your risk** by:

Providing **risk management strategies** to deliver you the best priced energy

Ensuring that you are **correctly billed** for your energy usage

Analysing your consumption to identify **energy saving opportunities**

Supplying the **resources, management and funding** to deliver your projects

Established in **1995**, we are a specialist **energy services company** listed on the London Stock Exchange with a market capitalisation of **£750m**.

Providing the **complete energy service**, from smart metering and data to the delivery of sustainability projects, we are proud to have been a long-term energy partner of large energy consumers including:

Sainsbury's

Santander

We know how to make you **#energyconfident**...

...but why should you be **confident in us**?

- The **trust and stability** of a PLC with national and international coverage
- Uniquely work with both **energy suppliers** and with leading **blue chip customers**
- Support and advise **regional, national and EU government** across a range of industry innovations
- Continual investment in our people and processes through the **deployment of the latest technologies**
- The complete range of services we provide are delivered via our own **in-house teams**, **differentiating us** from anyone else in the market

# SmartVision Pro

## The smarter energy savings tool

SmartVision Pro is our cloud-based energy management and analytics software platform which helps you **promote energy conservation** measures and **reduce costs** through a variety of innovative solutions.

Through this **highly-intelligent, intuitive and user-friendly software**, it's possible to inspect consumption patterns, verify project savings, track key performance indicators (KPIs), and even forecast and budget for the future, giving you **maximum visibility of your consumption** and the ability to identify, adjust, and ultimately save money.

## Key features

One easy-to-use portal for monitoring your entire building portfolio

Multiform functionality (PC, mobile and tablet devices)

Fast and user-friendly cloud-based software

Access to API integrations

Energy dashboard for automatic monitoring and targeting

Remote updates to ensure continuous improvement

Unlimited Scalability

## How does it work?

SmartVision Pro comprises of four key components:

### Dashboard

An interactive, flexible and customisable user interface  
- Fully configurable widgets

### Reporting

Auto-generated reports to stay up to date on energy use, trends and costs  
- Ability to access historical data and create bespoke reports

### Alerts

React to threshold breaches immediately through automatic notifications  
- Receive alerts via SMS or email

### Analysis

Smart analytic apps that break down complex meter data  
- Visualise and understand trends to affect behaviour change

# SmartVision Pro + Energy Desk

---

With the addition of our **Energy Desk**, you get all the advantages of SmartVision Pro and its online energy management portal, plus the added benefit of the dedicated support of **SMS energy analysts**.

Our experts help you to fully optimise SmartVision Pro through tailoring management information to suit your needs.

## Energy Desk

Monitor Smarter

The SMS Energy Desk provides an all-encompassing **energy monitoring service** that can adapt to the demands of organisations from any sector. This bespoke service allows you to visualise your energy use, energy cost and carbon emissions from a single building to an entire operational estate.

Using accurate data, our energy analysts work with you to mitigate **rising energy costs** across your estate. We do this by:

- Identifying over consuming sites
- Assessing operational performance
- Engaging key personnel
- Highlighting cost avoidance measures.

## Key Features

Strategic Energy Targeting

Employee Coaching and Engagement

Remote Desktop Analysis

Telephone Audits

Energy Reduction Planning

Cost Saving Measurements

Ongoing Technical Support
