Half Hourly Electricity Meter Operator & Data Services

# What we do

Delivering the future of smart energy

We are a specialist **energy services company** listed on the London Stock Exchange with a market capitalisation of **£850m**.

We provide the **complete energy service** via our three expert business areas:

## Smart Utility Infrastructure

Gas & electric connections  
Energy storage  
Distributed generation  
Electric Vehicle (EV) charging

## Smart Metering & Data

HH & NHH metering  
MOP & MAM  
DC/DA  
Sub metering

## Smart Energy & Sustainability

Risk Management & Bureau  
Energy Information Services  
Energy efficiency  
Sustainability projects

We are proud to have been a long-term energy partner of large energy consumers including:

We know how to make you **#energyconfident**

...but why should you be **confident in us?**

- The **trust and stability** of a PLC with national and international coverage
- Uniquely work with both **energy suppliers** and with leading **blue chip customers**
- Support and advise **regional, national and EU government** across a range of industry innovations
- Continual investment in our people and processes through the **deployment of the latest technologies**
- The complete range of services we provide are delivered via our own **in-house teams**, **differentiating us** from anyone else in the market

# Electricity Metering & Data

---

We help you to consolidate your **electricity metering activity and data**, enabling you to take full control of your consumption, improve sustainability, and reduce operational costs.

Our Electricity Metering & Data offering covers **Half Hourly (HH) Meter Operator (MOP)** and **Half Hourly Data Collection/Data Aggregation** services.

## HH Metering

### Features

- Accurate billing based on HH settlements/reads
- Use detailed consumption data to secure a better energy contract
- Enable a smarter energy management strategy
- MOP DC/DA service ensures a single **dedicated point-of-contact** for your metering and data needs

## MOP Services

### Features

- Installation, commissioning, testing, operation and maintenance of HH meters
- Nationwide coverage
- Guaranteed service level
- Supplier management
- Fault resolution

## DC/DA Services

### Features

- Retrieval, validation, estimation and processing of half hourly (HH) data
- Access to comprehensive consumption data for effective energy management
- Energy analytics software (**SmartVision**) and bespoke energy consultancy available at additional cost

# ESPO Framework Agreement

---

We have been awarded a place on the **ESPO Framework No: 512\_16 Half-Hourly (HH) Electricity Meter Operator & Data Services** (framework period: August 2016 - August 2020) for the below Lots:

**Lot 1** – HH Electricity MOP Services;

**Lot 2** – HH Data Collection / Data Aggregation Services (DC/DA);

**Lot 3** – Combined service of Lot 1 and Lot 2

## HH Electricity MOP Services

The installation, commissioning, testing, operation and maintenance on a rental, pay annual or purchase basis of a meter and communications link to meters covered by Codes of Practice 3, 5, 10 and any meter(s) impacted by future legislative change.

## HH DC/DA Services

The retrieval, validation, estimation and processing of Half-Hourly (HH) Data for the purposes of Settlement and/or Aggregation in compliance with the relevant Regulations.

## HH Electricity MOP & HH DC/DA (Combined Service)

Half-Hourly Electricity Meter Operator Service and Lot 2 Half-Hourly (HH) Data Collection / Data Aggregation Services priced together for a combined service offering.

Be **#energyconfident**
