

Energy Services

For the public sector

[sms-plc.com](https://www.sms-plc.com) 

A strategic partner for zero carbon

About SMS

Counting on more than 25 years of energy industry expertise, SMS is a strategic partner to large UK organisations and critical national infrastructure for reaching net-zero carbon.

To a trusted energy partner, we design, fund, install, and provide ongoing management of carbon reduction assets which facilitate a smarter, greener and more flexible energy system.

Established in 1995, we additionally provide strategic energy and carbon reduction consultancy services to the private and public sector businesses, allowing them to enhance long-term sustainability and reach net-zero carbon emissions.

SMS is headquartered in Glasgow with 14 locations across the UK and Ireland, employing in excess of 1,200 people.

Public sector frameworks

We provide a range of energy and carbon reduction services for public sector organisations through our framework agreements.

We are an established energy services provider for the public sector, covering the funding and delivery of low-carbon assets and energy-saving solutions across vehicle charging, heat networks, generation, storage, metering, data and other strategic services.

Our work with the public sector is recognised through our participation in reputable procurement frameworks, including the **Crown Commercial Service (CCS)**.

As a strategic partner for carbon reduction offering the complete energy service, we also partner with the public sector outside of these framework agreements, supporting local authorities, councils, hospitals and other public bodies to achieve their net-zero carbon goals.

Vehicle Charging Infrastructure Solutions (VCIS)

We offer a full end-to-end charging infrastructure solution through this **Crown Commercial Service (CCS)** framework, including funding, installation and project delivery to support the transition to low-emission vehicles and net-zero carbon.

The VCIS agreement, which is part of the CCS's Dynamic Purchasing System (DPS) framework, offers customers in central government and the wider public sector access to products and services that support electric vehicle (EV) charging infrastructure, such as charge points. By using SMS as a supplier, buyers can purchase a full end-to-end charging infrastructure solution or specific elements of our service to support the transition to low-emission vehicles.

Through this agreement, we can provide:

Service 1: Funding Options

A range of different funding options for charging infrastructure projects, delivered through our established Carbon Reduction (CaRe) Asset Funding Service.

Service 2: Products & Services

A full range of charging infrastructure solutions including consultancy and feasibility, hardware and accessories, installation and decommissioning, servicing and maintenance, software and project management.

OUR EXPERTISE

Our vehicle charging infrastructure solutions are built on our proven expertise and experience in this emerging sector, through which we are currently working with a number of local authorities and other private sector partners to deliver the Innovate UK Virgin Media Park & Charge (VPACH) project.

Heat Networks and Electricity Generator Assets (HELGA)

A range of services from simple energy auditing to the complex installation of generation and heat assets, including a one-stop-shop solution for end-to-end advisory, design, and project delivery.

The HELGA agreement, delivered via the Crown Commercial Services Dynamic Purchasing System (DPS), offers public sector organisations a range of energy demand management and generation services. Through HELGA, we are able to deliver:

Energy Advisory, Design & Technical Services

Services relating to the advice and design of any demand management or generation type.

Delivery Services

Services to install, manage and maintain any demand management or generation type.

Energy Purchase Agreement

Provision of Energy Purchase Agreements through direct or indirect opportunities.

Commoditised Products

Access to commoditised products through bulk purchasing.

One Stop Shop Solution

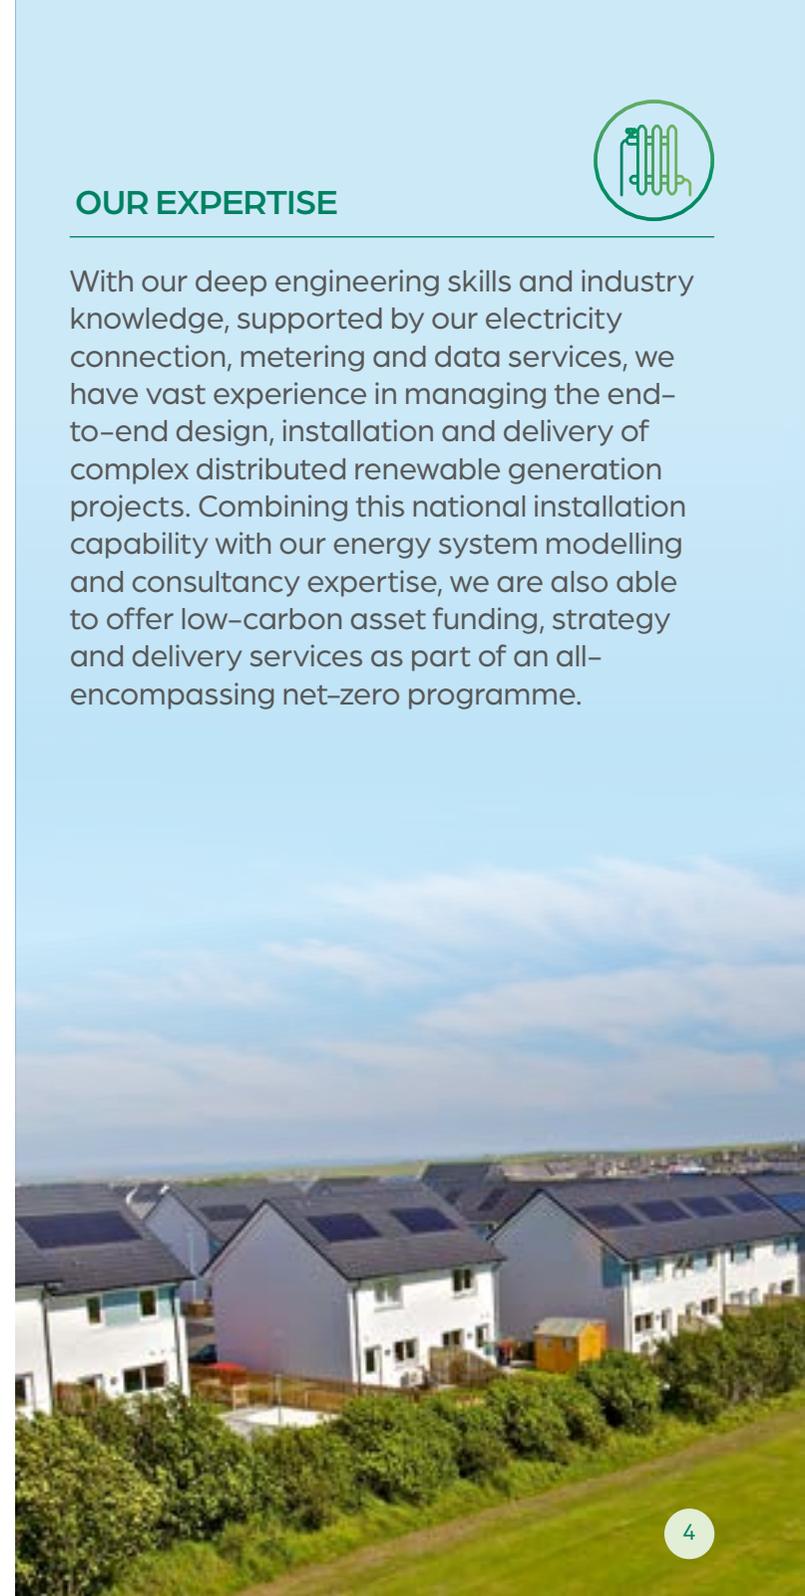

A solution to deliver full end-to end advisory, design, delivery, energy purchase agreements, and commoditised products.

OUR EXPERTISE

With our deep engineering skills and industry knowledge, supported by our electricity connection, metering and data services, we have vast experience in managing the end-to-end design, installation and delivery of complex distributed renewable generation projects. Combining this national installation capability with our energy system modelling and consultancy expertise, we are also able to offer low-carbon asset funding, strategy and delivery services as part of an all-encompassing net-zero programme.

CCS framework: RM3800

Utility Management Software, Metering & Ancillary Services

We provide half-hourly MOP DCDA and other electricity metering services to the public sector through this Crown Commercial Service framework.

We help you to consolidate your electricity metering activity and data, enabling you to take full control of your consumption, improve sustainability, and reduce operational costs. Our Electricity Metering & Data offering covers Half Hourly (HH), Non-Half Hourly (NHH), and Sub Metering, allowing you to effectively marry your entire range of metering needs via one comprehensive service.

Our Electricity Metering and Data services are provided through:

Lot 1 – Half Hour Electricity MOP Services

Lot 2 – Electricity Metering Services (non-half hourly and sub metering)

These services include:

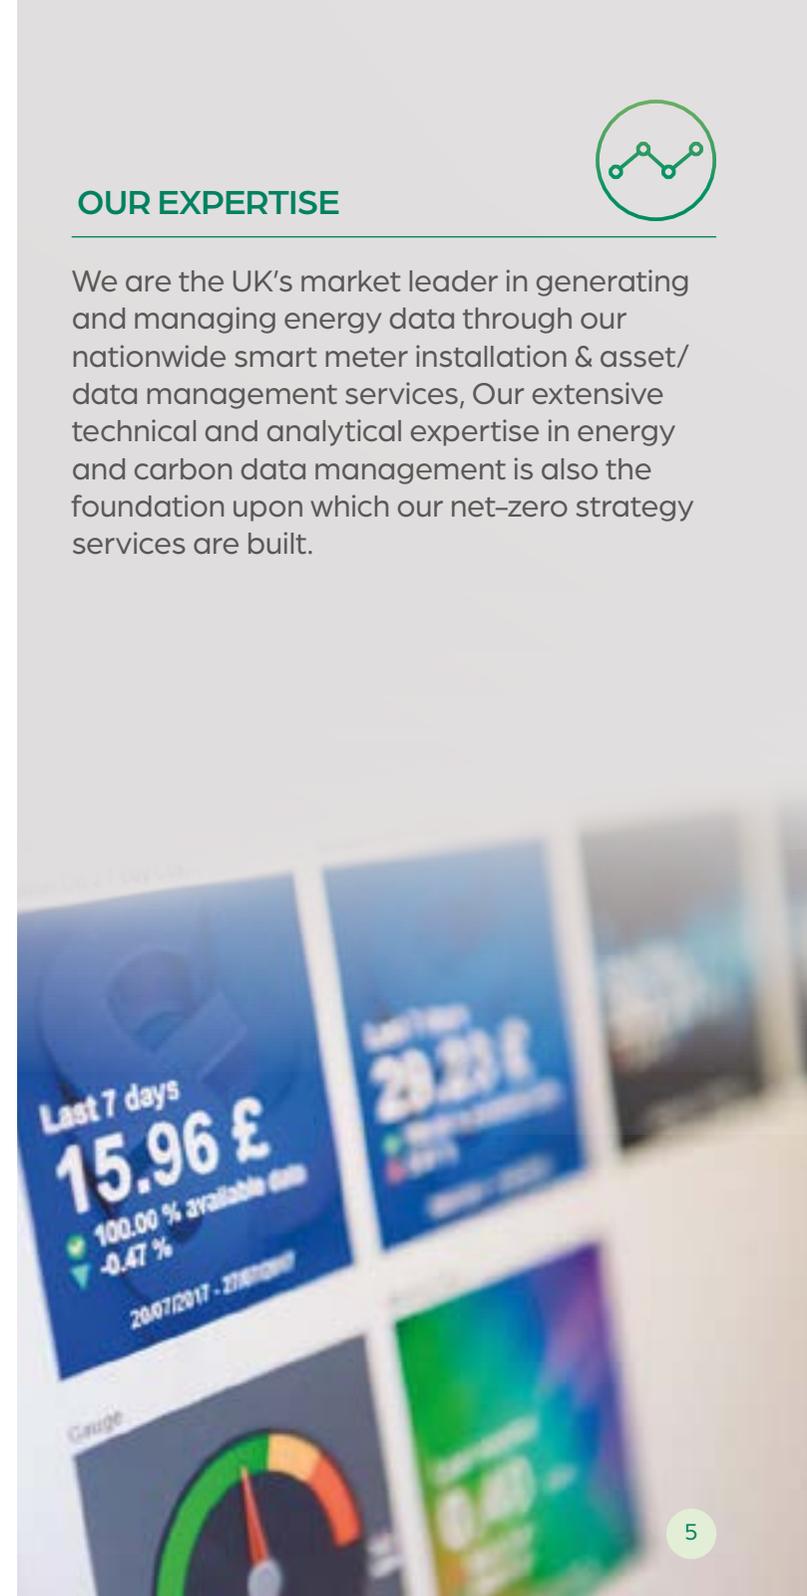

- Lease, installation and maintenance of meters
- MOP and Data Collection and Data Aggregation (DCDA) services
- Provision of our energy management software, SmartVision.

OUR EXPERTISE

We are the UK's market leader in generating and managing energy data through our nationwide smart meter installation & asset/data management services. Our extensive technical and analytical expertise in energy and carbon data management is also the foundation upon which our net-zero strategy services are built.

NHS shared business services

Bill Validation, Recovery & Compliance

Ensuring you are only billed for the utilities used at the rates agreed with your supplier.

This framework provides an OJEU compliant route for NHS and the public sector to access bill validation, cost recovery services and compliance services for utilities such as energy and water.

Service 1: Bill Validation

Bill validation on power and water supplies.

Service 2: Recoveries

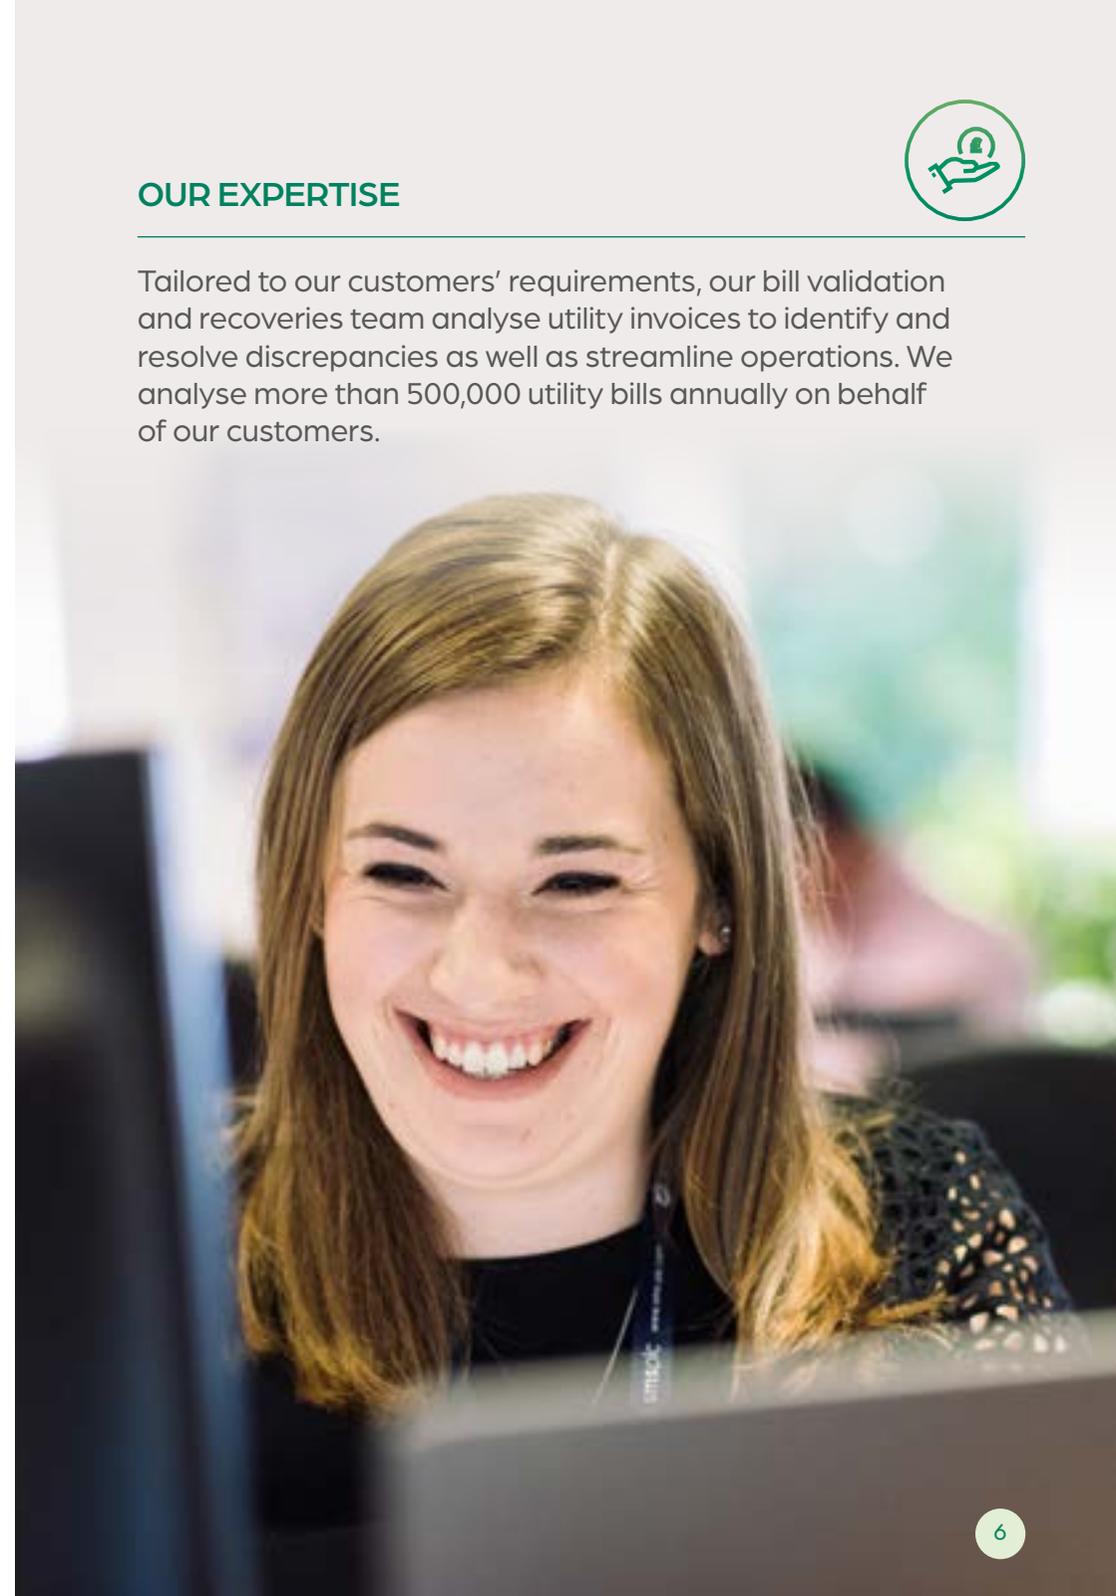

Historical revenue recovery service on power and water supplies.

[▶ Visit the framework webpage](#)

OUR EXPERTISE

Tailored to our customers' requirements, our bill validation and recoveries team analyse utility invoices to identify and resolve discrepancies as well as streamline operations. We analyse more than 500,000 utility bills annually on behalf of our customers.

Laser energy: DN480090

Power Purchase Agreements

LASER's Flexible Procurement Frameworks provide an OJEU compliant route to arranging procurement and supply of Gas and Electricity, as well as opportunities to take advantage of a number of additional services relating to energy usage, storage, savings and other innovative industry solutions. Through this framework we provide an end-to-end service for the public sector in **Power Purchase Agreements**.

[▶ Visit the framework webpage](#)

OUR EXPERTISE

We are one of the UK's leading independent energy consultants to manage the risk and procurement process, securing our clients the best value energy supply contracts, and specialising in the purchasing of renewable power for your low-carbon strategy. Our success is due to our deep market knowledge and ability to work impartially with UK energy suppliers.

ESPO

Half Hourly Metered, Non Half Hourly and Unmetered Supply

We provide half-hourly MOP and DCDA services to the public sector through this ESPO framework. Our comprehensive service will help you consolidate your electricity metering and data activity, enabling you to take full control of your organisation's energy consumption, improve sustainability, and reduce operational costs.

Lot 1 – Half-Hourly (HH) Meter Operator Service (MOP)

Lot 2 – Half-Hourly (HH) Data Collection / Data Aggregation Services (DCDA)

Lot 3 – A combined service of Lot 1 and Lot 2

[▶ Visit the framework webpage](#)

OUR EXPERTISE

We are the UK's market leader in generating and managing energy data through our nationwide smart meter installation & asset/data management services. Our extensive technical and analytical expertise in energy and carbon data management is also the foundation upon which our net-zero strategy services are built.

2buy2

Utilities and Energy Management

2buy2

Through this 2buy2 framework, we provide a full range of energy management services, from high-quality energy surveys, that set clear and realistic objectives, to practical guidance and support that helps rationalise your organisation's consumption.

Energy Auditing & System Modelling

Our team of experienced advisors provide impartial energy surveys and use energy system modelling to form the basis of your energy strategy.

Strategic Energy Consultancy

A range of integrated strategy and consultancy services to improve energy usage and lower carbon footprint to net zero, including implementation of ISO 50001 certification.

Energy Optimisation

Our expert asset tracking service – which includes ongoing management and maintenance of your energy assets and systems to ensure optimum performance – as well as the continual monitoring of data and costs through our Smart Energy Bureau.

[▶ Visit the framework webpage](#)

OUR EXPERTISE

We have been working with large organisations from the private and public sectors to reduce carbon emissions and achieve energy savings for 25 years. Our energy expertise and strategic services help our customers adapt to a changing energy system and to fully embrace the opportunities of environmental sustainability – from cost reduction and risk mitigation to building resilience and brand reputation.

Energy Brokerage Services

Through this framework, our experienced energy procurement team provides expert advice and market knowledge to deliver the best priced energy through fixed and flexible purchasing strategies.

Managing energy risk

We track and analyse markets in real time, identifying opportunities and threats. We apply our market intelligence to advise on energy purchasing and procurement strategies.

Choosing energy contracts

We develop energy strategies based around unique customer requirements. Our strategies take advantage of market dips whilst protecting budgets from costly wholesale increases.

Fixed energy purchasing

We work with all UK energy suppliers to secure significant savings, the best possible rates and fixed pricing contracts to avoid impacts of market volatility.

Flexible energy purchasing

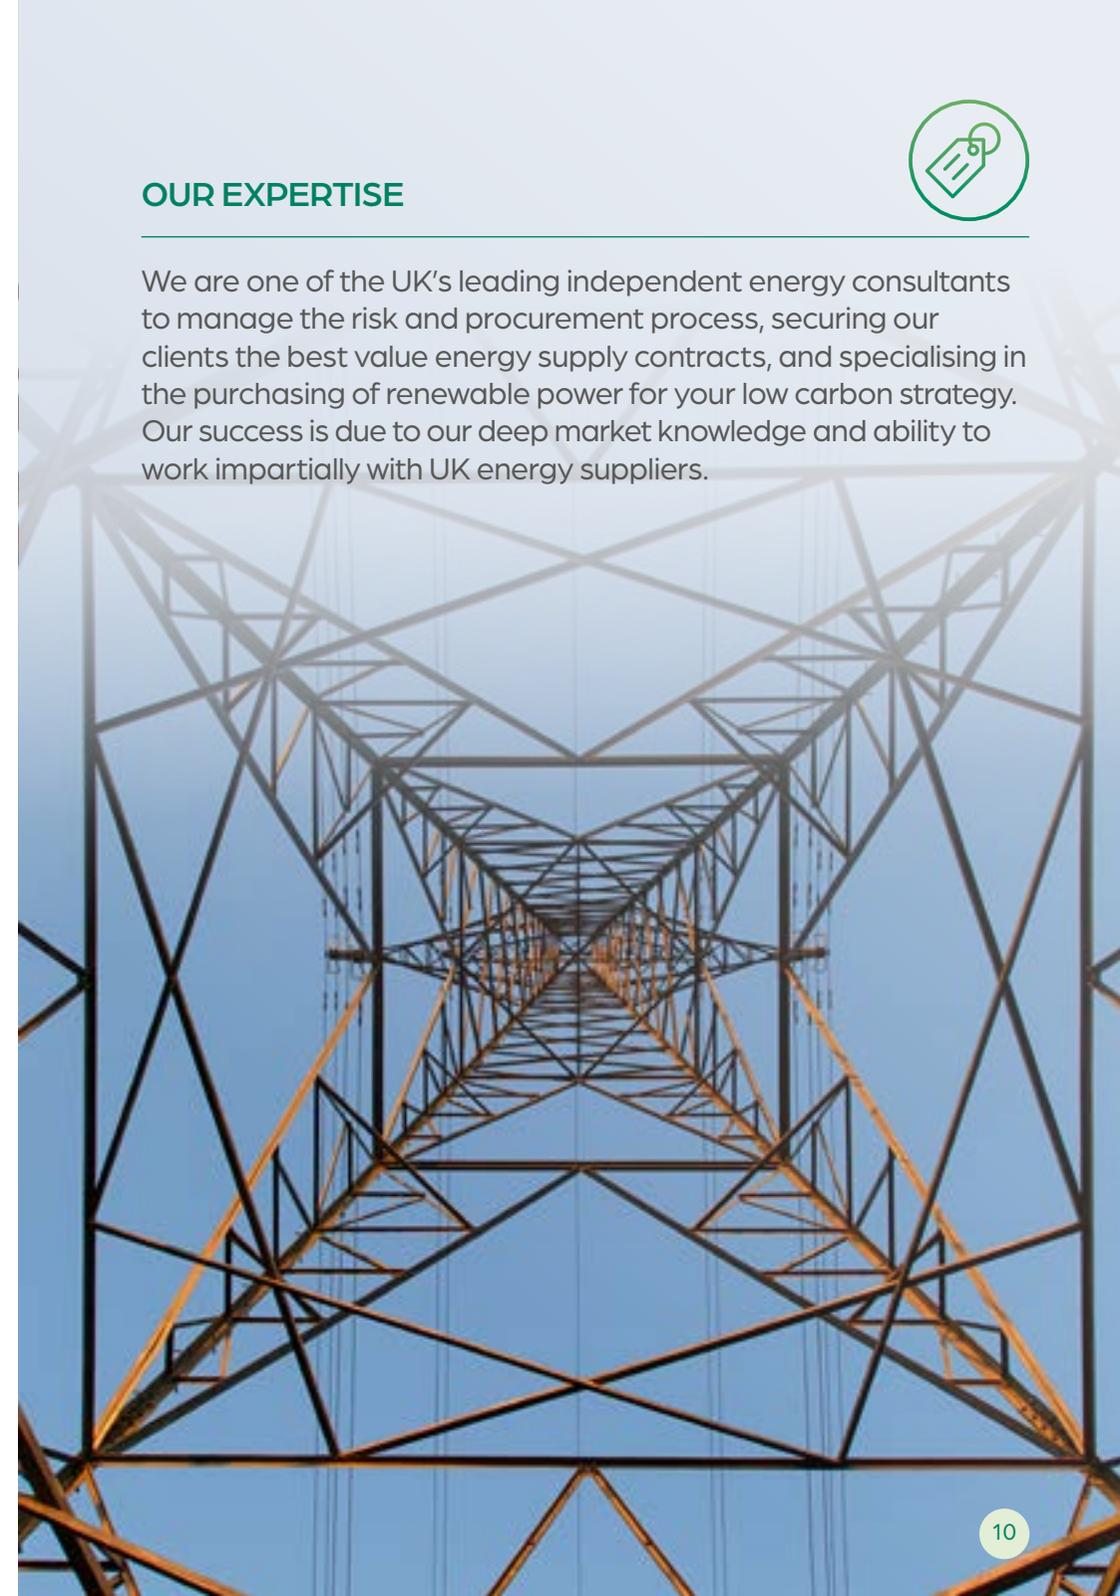

Our flexible procurement allows larger energy consumers to purchase energy direct from wholesale markets, spreading the price risk over multiple purchasing decisions throughout the year.

[▶ Visit the framework webpage](#)

OUR EXPERTISE

We are one of the UK's leading independent energy consultants to manage the risk and procurement process, securing our clients the best value energy supply contracts, and specialising in the purchasing of renewable power for your low carbon strategy. Our success is due to our deep market knowledge and ability to work impartially with UK energy suppliers.

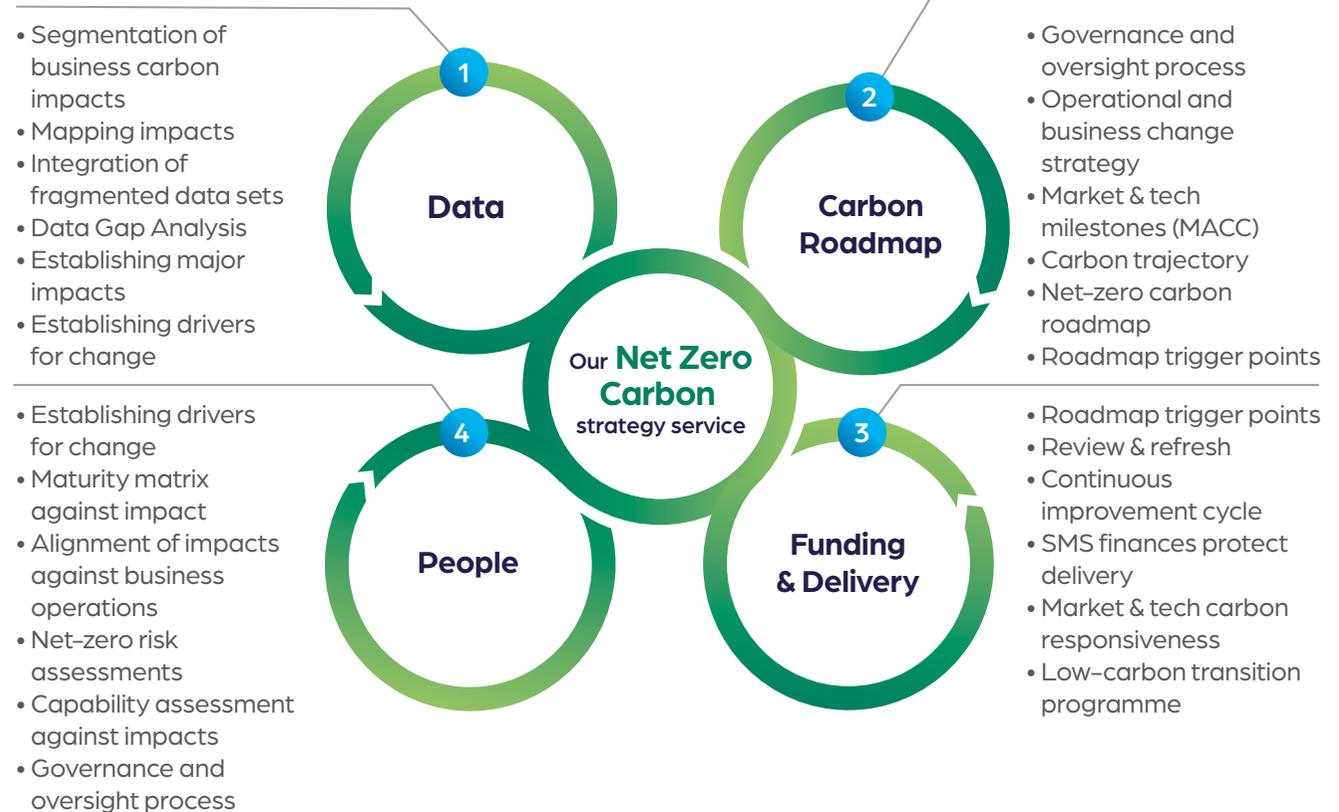

The net-zero strategy service

Our net-zero strategy service is designed to support public sector organisations throughout the planning, implementation and review of long term energy and carbon reduction programmes, making it easier and more cost effective to realise your net-zero goals.

Supporting your organisation at all levels of strategy development and delivery – and mitigating some of the more critical risks inherent to a large-scale energy transformation programme – the flexibility of our framework enables you the enter a net-zero partnership with us at any stage of the strategy, from the initial planning stage, or at the time of project delivery thanks to our funding solutions and engineering expertise.

OUR NET ZERO CARBON STRATEGY SERVICE

1 Data
Uncovering and analysing your business data to set the opportunities and boundaries for net-zero carbon.

2 Carbon Roadmap
Establish long-term trajectory and milestones to provide clarity and transparency, and identify suitable projects to deliver carbon reduction.

3 Funding & Delivering
We design, fund, deliver and manage your carbon reduction projects, then review and refresh your strategy to ensure continuous improvement.

4 People
Working with your people to identify roles, responsibilities, and risk areas, and the capacity and coverage to consolidate approach across the business.
